Big Bang

Atom & Molecule

Micro Energy

Aura Energy

Author: Bryan Benson

VOLUME #1

# INOCRITY

Pronounced; (in) (awk) (writ) (ee)

Designed and Researched 1968 thru 1980

© 1990, 1991, 2018 Released May 2018

## To Assist the Reader;

Search online photos of the Barrel Eyed Fish whose brain illuminates with energy.

- Bats emit energy to avoid objects.
- Animals sense fear in their prey.

**Mass Coincidence** of prophets predictions prove accurate. Psychics feel your car keys to connect with your aura energy then rap off events and names of people in your life.

**Mass Coincidence** of talking at the same time, stopping at a stop sign the same time and more.

- A field of aura energy is around us as aura energy streams to and from our mind.

Our evolution allows ability to sense aura energy thus we advance from subliminal to conscious awareness of aura energy.

## To Assist the Reader;

1<sup>st</sup> Watch DVD's on Creation of our Universe as atoms and molecules create matter and cells.

2<sup>nd</sup> Comprehend outer space as dark and void. Big Bang then occurred with language governing atoms, molecules and elements as matter and life formed with evolution.

3<sup>rd</sup> Realise something allowed Big Bang. We refer this something as our Supreme Entity.

As in a chain of command, Supreme Entity allowed Big Bang who allowed micro energy above atom and molecule to govern language of creation. Life and evolution then occurred at the pace of universe time with aura energy.

- We are bound together within aura energy. We own nothing in respect to privacy of thought. Anticipation and movements are not private. We own nothing only borrow.

Reasonable theory compliments scientific proof as we journey from a beginning of time to date.

Are You Ready for INOCRITY

## PREFACE

- Natural Energy = in the universe before we evolved.
- Unnatural Energy = man made energy as; radar, cell phones, microwaves and power grids for electricity.
- Aura Energy = streams in an energy field to and from our mind with cerebral codes.
- Micro Energy = above atom and molecule, micro energy originates from Big Bang and governs language of natural energy creation including aura energy.
- Supreme Entity = allowed Big Bang with micro energy to govern language of creation for atom, molecule and matter. Life followed with evolution to interact with aura energy.
- INOCRITY = a food chain within aura energy. In a feeding frenzy, we are tapped or possessed as;

VICTIMS or FORTUNATE RECIPIENTS

# PRINCIPLE of INOCRITY

A food chain and language in the world of aura energy ensures we are tapped or possessed as;

VICTIMS or FORTUNATE RECIPIENTS

## VICTIMS

- Stillborn in the womb, elderly, addictions. The challenged and everyone to a degree.

## FORTUNATE RECIPIENTS

- A superstar is born; basketball, football, boxing, athletic ability and more.
- A creative boom occurs with musicians, inventors, scholars and everyone's space or serenity on a daily basis. We are all bound together in aura energy, nothing is private.

## Clarification;

Cerebral codes of natural energy stream to and from aura and the mind. One language of aura energy referred as INOCRITY ensures we are in this food chain as predator or prey.

### Supreme Entity

### Cerebral Codes Stream to Aura

At the pace of universe time our evolution includes ability to sense aura energy. We refer findings as 6<sup>th</sup> sense, intuition, psychic, the ID or unknown, paranormal, prophecy with emphasis on **Mass Coincidence** relates to aura energy.

**Mass Coincidence;**

- a) Stop at a stop sign same instant opposing car does? Raise a glass the same time as someone else? Sneeze, laugh or speak at the same time?
- b) Mind feels full? Disorders? Divorce? Hissing noise? Need a clearing? Need space? Psychics and premonition? Personality conflict?
- c) Went to get something and when you get there you forgot why or what you went there for?
- d) In a theatre while watching a movie someone made movement or sound identical to a scene when they never saw the movie before?
- e) Could someone be talking at the same pace you think or read? Is your mind private?

**Mass Coincidence** reveals past, present and future resides within aura energy where we are all bound within aura energy as predator or prey in the food chain of INOCRITY.

Equalisation of INOCRITY is revealed hereinafter.

**Mass Coincidence** witnessed by most reveal we are not possessed by demons being we project and are projected upon by our own combination of aura energy. Spiritual gifts result from language in the unseen world of aura energy.

Personality conflict? Try you are near epicenter of aura energy, not a VICTIM and in an ok place.

Songs won't leave your mind? At least you know what's in there. They say 80% of our mind is not used. Update; Aura energy just entered the calculation as a tenant renting mind space.

- Unexplained shootings from reasonable people? Suicide?

INOCRITY = Object to incur a deviating process to endow. There is equalisation of aura energy.

Email an encounter you observe. We may post online or feature in Volume #3 where we explain the above plus building and protecting your aura.

HARD HATS ON as we reveal a food chain in the unseen world of aura energy; INOCRITY

Chapter 1 – Beginning of Time with Energy

Chapter 2 – Cerebral code Frequency, Address

Chapter 3 – Limits of Theoretical Projection

Chapter 4 – Mental Gymnastics, Religion

Chapter 5 – Screenplay intro for INOCRITY

Equalization

Aura Interaction

# Chapter 1

## Beginning of Time with Energy;

Big Bang occurred. Something had to allow all of this. We cannot prove anything before Big Bang therefore conclude a Supreme Entity allowed Big Bang and micro energy to govern a language of creation including aura energy.

Scientific Proof documents atoms, molecules, elements, matter and energy created universe, galaxies, solar system, planets and life. Evolution followed at the pace of universe time.

- We are not saying some God in outer space watches the universe with his eyes creating all of this with his hands. Fact is we don't know.
- We are not saying our galaxy is a molecule or atom to a larger world, object or fungus out there. Fact is we don't know.

We are saying a Supreme Entity allowed Big Bang. Micro energy governs molecule, atom and aura energy We evolved ability to sense then interact with aura energy. We project to aura and are projected upon by aura energy.

## Clarification;

A Supreme Entity above atom and molecule allowed micro energy to govern a language of creation with atoms, molecules, elements, gas and matter.

Life then evolved at the pace of universe time with ability to sense aura energy thus we advance from subliminal to conscious awareness of aura energy.

Aura energy streams to and from our mind.

The Human Mind:

From This

To This

Mind receptors receive aura energy triggering impulse for muscle movement, heartbeat and life functions infinite includes instinct, thought and memory.

From Big Bang to what we are now is result of evolution at the pace of universe time.

- As you progress in reading we rely on the term **Mass Coincidence** to support or fuel reasonable theory as scientific proof.

## Chapter 2

### Cerebral Code and Address;

Email, cellphone and GPS have send codes with an address to receive a stream of information.

### Clarification;

Oxygen and Hydrogen molecules have send codes with an address to receive. Upon contact both create water.

Earth's surface is not a total mass of water meaning not all Hydrogen and Oxygen molecules upon contact create water.

This reasonable theory fuels scientific proof a language of equalization within micro energy does exist and appears governed by a Supreme Entity.

### Clarification;

Mind receptors respond only to natural aura energy with matching cerebral send and receive codes trigger calculations for infinite functions include movement, instinct, thought and memory.

Mind receptors do not respond to all energy or we would be a twitching mass of spasm. This affirms equalization within aura energy does exist.

## Unnatural Energy;

Equalization of aura energy prevents unnatural energy from triggering mind receptors is a vital and fortunate process to have.

- Unnatural energy did not evolve at the pace of universe time from Big Bang.

Man-made unnatural energy arrived having no governing authority from Supreme Entity and no cerebral codes mind receptors relate to.

Unnatural energy fatigues the mind having to calculate and reject unnatural energy then accept natural aura energy triggering mind receptors.

Only natural energy evolving at the pace of universe time evolved cerebral send and receive codes sufficient to trigger mind receptors. This is language of equalization within aura energy.

## Clarification;

Our massive energy field of unnatural energy around our globe resembles a creeping vine or hitchhiker trying to catch a free ride burning and overworking receptors thus altering evolution with natural energy and balance of aura equalization.

### Clarification;

Unnatural energy streams to and from aura like a parasite or hitch hiker.

Unnatural energy resembles fresh water with bacteria. We drink then get sick.

- Fatigue and disorders result having to calculate and reject this surplus energy.

Unnatural energy arrived having no evolution at the pace of universe time receptors relate to.

### Final Clarification;

Scientific Proof documents the brain as matter whose receptors receive natural aura energy triggers impulse allowing movement of limb or muscle, heartbeat and senses for millions of life functions infinite including instinct and thought.

Unnatural energy forces a rate of evolution to our 24 hour clock and not the pace of universe time.

- Not all energy triggers mind receptors is reasonable theory complimenting scientific proof an equalization process within the language of aura energy exists.

We address in detail Volume #3

## Chapter 3

### Limits of Theoretical Projection;

Our evolution with natural energy at the pace of universe time allows ability to sense, interact and describe aura energy verbally and writing.

- We project and are projected upon.

**Mass Coincidence** reveals present, past and future reside within aura energy.

**Example;** A North Carolina geologist chose an absolute desolate spot and stuck his pick on a prehistoric fossil. Aura spirit knew of this fossil triggering impulse to guide many more geologists, scientists and people's discovery or encounters.

**Mass Coincidence** of predictions from prophets, 6<sup>th</sup> sense, mother's intuition, premonitions and alike is aura energy on a daily basis.

To sense and interact with aura energy requires projection to and from aura similar to a blind bat projects to navigate.

- We project and are projected upon is one process of evolution within aura energy.

Email an encounter, discovery or coincidence of intuition or anything relating we can post.

## Limits of Theoretical Projection; INOCRITY;

A language within aura energy referred as INOCRITY ensures;

- We are Victims or Fortunate Recipients.

Victims

Fortunate Recipients

Victims of the food chain of aura energy are;

- Still birth in the womb with no defence mechanism or aura barrier except what maternal instinct provides.
- Elderly whose faculties and defence mechanism break down aura barriers.
- Drugs sacrifice your soul to aura energy.
- Mentally challenged disorders are not all genetic. Some result from being tapped excessive in the womb or thru our life.
- Depression and paranoia is declared as not hereditary and a process of equalization countering INOCRITY.

We address in detail; Volume #3

Creative boom in 60's. LSD condemns your mind to the food chain of INOCRITY to become a VICTIM feeding FORTUNATE RECIPIENTS.

- Drug use guarantees a soul sacrifice to the food chain of INOCRITY.

Clarification;

Taking drugs rips your aura barrier apart in a soul sacrifice to aura energy. In a feeding frenzy, aura energy streams to and from VICTIMS creating FORTUNATE RECIPIENTS. VICTIMS mostly homeless sense and afraid to admit possession are in fear of being committed. Some believe we are possessed then seek revenge. Example to the max portrayed in a movie with a title;

**“Dawn of the Dead”**

Equalization Vs INOCRITY;

A feeding frenzy can rip a sane person's core of sanity to ground zero without taking drugs.

Aura equalization is a language preventing a vicious attack on one's aura.

Like the Robin Hood effect, aura equalization responds to our actions and thoughts to protect where INOCRITY is an event of sheer predator.

## Clarification;

Supreme Entity governs equalization of aura energy and limits theoretical projection.

- There are limits to theoretical projection.
- Build your aura. Protect your aura. Achieve the buffer zone of equalization.
- Understand language in the unseen world of aura energy. . . We explain in Volume #3.

Knowledge retained, arranged creatively diverts beneficially unwanted gestures thus enticing creative retentive intellect with the exception of;

- Somebody could be talking at the same pace you think or read. How private is your mind? This is one precipice of INOCRITY.

Aura energy knows everything. We are all bound together in aura energy where nothing is private. We own nothing. We only borrow and return in an ongoing food chain within aura energy.

Equalization of aura energy ensures you are not a VICTIM or FORTUNATE RECIPIENT and neutral in status.

Secure privacy of the mind. Self exorcism on a small scale. Achieve equalisation you are not VICTIM or FORTUNATE RECIPIENT. Volume #3

# Chapter 4

## Mental Gymnastics; Theory and Fact

Natural or micro energy is our immune system healing damaged tissue without unnatural energy.

Unnatural energy used by paramedics starts a failing heartbeat with paddles and electric current.

### Clarification;

Like cave man seeing fire the first time we altered unnatural energy for minor medical healing. We found limitations compared to what micro energy offers as a natural process of healing.

- Parkinson's, depression, anxiety and alzheimer related symptoms are believed not genetic and may subside if we harness micro energy's cerebral codes specific for each impairment or treatment.

On the contrary we fear man's ability to control micro energy based on the killer bee disaster.

Harnessing micro energy incurs risk to evolution and language of atom and molecule and aura energy could spiral out of control with no remedy.

“Why Tamper With Micro Energy”

## Clarification;

For scientists to master micro energy results a man-made killer bee effect of infinite disaster to the language of natural energy.

Ability to alter atom and molecule's path of creation and evolution results infinite destruction.

- Trees may not create oxygen in daytime.
- Oxygen meets hydrogen creates water where water may not create.
- Unnatural energy may finally enter and alter our existing language of aura energy.
- Evolution from the womb to birth may not function the pace of universe time.

### Theory #1; Altering Evolution

**a)** being we created a force field of unnatural energy around the globe which include power grid transformers that solar flares enter and explode.

**b)** being solar flares break down Ozone.

Then our power grid and force field of unnatural energy around the globe is similar to our sun's solar flare of electricity on a small scale. Ozone is not breaking down, rather is merely not creating as if micro energy evolves with presence of unnatural energy we are altering micro energy.

## Theory #2; Unnatural Energy

1. Measure energy of the sun, solar flares and natural energy before we evolved.
2. Measure energy from cell phones, radar, satellite, microwaves and all transmissions of unnatural energy after we evolved.
3. Study behaviour disorders of babies in the womb before 1970's and after.

Are there more hyperactive and retention span disorders or depression per capita after 1970?

Has the mind reacted to unnatural energy?

- Are honey bees disappearing as magnitude of unnatural energy increases?
- Is the earth a large microwave oven we are cooking at a slow pace?
- Are public shootings a result of unnatural energy affecting the mind?

As we sense intrusion of unnatural energy could result a cause of paranoia and affects relating. Doctors must realise cause of paranoia in part is unnatural energy and INOCRITY in aura energy.

“Mess with the Bull, you get the Horn”

“We Have Messed With Mother Nature”

### Theory #3; Psychics

Science declares our brain calculates millions of functions with portions of our brain as memory, sight and movement etc.

Science has not defined what the 80% unused portion of our brain matter does and science has not considered aura energy into any factor.

**Mass Coincidence** of accuracy from psychics and prophecy plus people doing things the same instant is reasonable theory fueling scientific proof we are bound together within aura energy. This reveals nothing is private. We own nothing.

Psychics do not enter your mind and enter aura energy for the find. Everything resides in aura energy as we all project and are projected upon.

We believe mind receptors house only cerebral send and receive codes for that function. Bulk of energy for memory and functions infinite are housed within aura and not in your mind.

To do anything mind receptors stream proprietary send or receive codes to aura who returns bulk energy to receptors feeding or streaming your anticipation or request for movement, thought and life functions infinite.

We address in detail; Volume #3

## Theory #4; Rogue Energy

When you pass away, events of your entire life, spirit or soul remain in aura as a form of rogue energy with cerebral send codes intact.

Rogue energy send codes cannot find receptor receiving codes being you are no longer there.

- We refer this as rogue energy or cerebral codes looking for their recipient.

Rogue energy trying to locate the person not there explains paranormal as we sense intrusion.

Our mind may fabricate presence of someone we lost in a defence mechanism resolves trauma however a major % of encounters is true rogue energy causing a reaction of communication to all.

### Clarification;

You pass away. Everything you did remains in aura as rogue energy with no recipient believed by most to fade away.

I believe rogue energy remains out there as spirits reappear through aura energy guiding discovery of fossils or save lives in peril by a 6<sup>th</sup> sense or all spiritual gifts good or evil derive from aura energy.

Email us an encounter. [Encounter@Talent7.com](mailto:Encounter@Talent7.com)

## Theory #4; Mood Altering

Development of devices altering or harnessing micro energy create speculation for public outcry.

A newly created robot senses our moods in a download process on screen.

Will they upload cerebral codes to change our moods at the flick of a switch is frightening this aspect of micro energy manipulation.

- To create a device like a pacemaker to change our moods is frightening.

With no restore feature in the event of upload failure if send codes run bandit, what disaster are we creating with tax dollars?

- Should we fight for legislation restricting works to area 51?
- Is privacy at risk under plastic Rights of Charters and Freedoms?
- Should the sun explode and save our slow painful future?

Could countries perfect devices of cerebral code interaction then stream cerebral codes by satellite and GPS a city? Who needs nuclear at this rate.

## Theory #5; Psychics and Prophecy

A psychic is not in your mind. Your everything is in aura energy. Nothing is private.

- We all project and are projected upon.

**Mass Coincidence** of geologists or science discoveries occur as if guided from spirits who know of the treasure and provide impulse for the find thru aura energy as a spiritual gift to us.

**Mass Coincidence** of people speaking, sneezing, moving or doing things at the same time.

**Mass Coincidence** supports aura energy knows everything harnessing past present and future.

**Mass Coincidence** could be language of aura energy communication or 2<sup>nd</sup> coming of a spirit, or presence in lieu of inability to speak.

Aura energy is one phase of natural energy governed by Supreme Entity. Our calculation of AMC and base of deductive reasoning reveal Rogue energy an expired phase of natural energy exists either in a new dimension or in aura energy with no dimension where equalisation governs communication from dimension or real time.

In detail, revealed in Volume #3

We welcome radio, TV or DVD for any debate.

## Mental Gymnastics / Religion or Belief;

Witch craft, devil worship, cults and world religion of all denominations are pioneers of their era and unaware spiritual gifts reside within aura energy.

To not deprive above pioneers of their belief or practise, all nationalities and religions of good, atheist or evil should focus on fact;

- Supreme Entity is our creator from a point creation began referred as; Big Bang.

World religion or belief refuse to admit we are a product of evolution to save their belief of religion.

**a)** with no proof a mystical person created the universe with eyes and hands let alone walk on water and part the Red sea.

**b)** with reasonable theory and scientific proof a creation with evolution occurred after Big Bang.

Then all stands to reason Supreme Entity before Big Bang is our creator and aura energy exists by **Mass Coincidence** and reasonable theory fuels scientific proof.

World religion and beliefs in the manner they operate portray their names similar to a bunch of baseball teams. Their denomination is home team. Different belief is the opposition.

Saying we did not evolve resembles handing your followers a Lewis and Clark map in 2018 to tour North America with no GPS. Evolution reveals higher ranks of reasonable theory fueling scientific proof Vs any primitive or unproven instance.

To admit evolution would increase belief and popularity in any belief or denomination.

So called demonic possession or spiritual healing is merely process of INOCRITY with equalization.

INOCRITY; object to incur a deviating process to endow. Evolution at the pace of universe time allows conscious awareness and interaction with aura energy to manipulate or accept equalization.

**Mass Coincidence** of people moving or speaking the same time and psychic or prophets past and future accuracy is reasonable theory fueling scientific proof we are bound within aura energy where we project and are projected upon.

Spiritual gift from good or evil stands to reason derives from aura energy Vs primitive theory.

Portals are not the transfer case for spiritual or demonic possession for a Satan, poltergeist or paranormal is merely rogue or aura energy fading as a distant star with no recipient to connect.

If there are dimensions we cannot see like a 4<sup>th</sup> or 5<sup>th</sup> then a Satan, demon, gods and rogue energy must be hiding there according to theory.

On the contrary, aura energy is here and requires no dimension as we interact with aura energy as we all project and are projected upon is fact.

**Mass Coincidence** may reveal aura energy as the 2<sup>nd</sup> coming of a spirit communicating in the form of aura energy in lieu of inability to speak.

Finally, world religion and evil worship or any belief should consider aura equalization where spiritual gifts or spiritual experience is aura energy Vs dimensions of a hypothetical state.

**INOCRITY**; object to incur a deviating process to endow in a feeding frenzy within aura energy. Learn equalisation. Protect and build your aura.

We clarify in Volume #3

## Chapter 5 – Screenplay intro for INOCRITY.

**Intro:** Big Bang. Accelerated FPS. Energy creating planets as DVD's show planet creation. Events of nature, plant and animal evolution.

**Drastic Sound Effect:** Fish eats fish, animal preys on animal or devour plants for food. Molecules devour and create galaxies.

Salt water eats iron at rapid FPS.

**Fade in;**

Professor instructs class.

### **PROFESSOR**

They can transplant a single mind receptor into a computer and upload your mind and information from aura energy.

### **STUDENTS**

Wow. Cool.

### **TV NEWS COMMENTATOR**

A medical breakthrough allows a mind receptor transplanted (fade) into a computer.

**Cut to:** Cars at stop sign stop and go same time repeated 4x. Argument breaks out.

## **TV NEWS COMMENTATOR**

Scientists have harnessed Micro Energy and realise they have a weapon foreign countries may want. You mind is (fade) no longer private.

**Cut to:** Hippies with signs; Mind Reading Violates privacy. Supreme Entity our God.

A hippie raises his head till we see black letters across the forehead: SUPREME ENTITY.

## **HIPPIE**

Read my mind? Read this.

Fade Out

---

END of SCREENPLAY SAMPLE

Updated log lines and synopsis on; [Talent7.com](http://Talent7.com)

## From the Author;

Born in Canada and raised in the USA, author pledged allegiance to flag of the United States of America for years in school and will support any effort to keep this in the schools.

INOCRITY is a relentless language in the unseen world of aura energy. Nothing you think or do is private. Aura energy knows everything. Like a cat stalking prey, your mind is not private.

This booklet attempts to advance awareness of aura energy where a Satan, God, religion or belief in lieu of inability to speak communicates as aura energy is their language. Maintain equalization within aura for inner peace and neutral status.

Volume #3 discerns the nature between any god, evil or atheist as **Mass Coincidence** and process of elimination reveals reasonable theory fueling scientific proof we are all bound together.

If you received this booklet and did not purchase, kindly respect our concept and buy a book to enable Volume #3 the final release of INOCRITY.
